

Agile Planning & Sprint Management

 **Purpose:** This page documents how business requirements were translated into Epics, User Stories, and Sprint Plans using Jira Agile project management practices.

The project backlog was organized into Epics and prioritized across three development sprints based on business value, dependencies, and implementation complexity.

Epic Structure

Requirements were grouped into five Epics representing major business capabilities of the platform.

Key	Summary	Priority	Status
SCRP-1	Subscription Management	🟡 Medium	TO DO
SCRP-2	Cancellation Feedback	🟡 Medium	TO DO
SCRP-3	Retention Management	🟡 Medium	TO DO
SCRP-4	Cancellation Workflow	🟡 Medium	TO DO
SCRP-5	Reporting & Analytics	🟡 Medium	TO DO

 Synced just now • [5 items](#)

Sprint 1 – Cancellation Workflow

Focused on implementing the customer cancellation journey, feedback collection, and cancellation confirmation process.

Key	Summary	Priority	Status
SCRP-6	US-001: Access Cancel Subscription Option	🔴 Highest	TO DO
SCRP-7	US-002: Select Cancellation Reason	🔴 Highest	TO DO
SCRP-8	US-003: Provide Additional Cancellation Feedback	🟡 Medium	TO DO
SCRP-12	US-007: Review Cancellation Impact	🟡 Medium	TO DO
SCRP-16	US-013: View Subscription Details Before Cancellation	🟢 Low	TO DO
SCRP-17	US-014: Select Multiple Cancellation Reasons	🟡 Medium	TO DO
SCRP-21	US-008: Confirm Cancellation	🔴 Highest	TO DO
SCRP-22	US-009 Receive Cancellation Confirmation	🟠 High	TO DO

Sprint 2 – Retention Features

Focused on implementing personalized retention offers and subscription retention options.

Key	Summary	Priority	Status
SCRP-9	US-004: Display Relevant Retention Offer	🔴 Highest	TO DO
SCRP-10	US-005: Accept Retention Offer	🔴 High	TO DO
SCRP-11	US-006: Reject Retention Offer	🔴 High	TO DO
SCRP-18	US-015: Downgrade to Lower Subscription Plan	🔴 High	TO DO
SCRP-19	US-016: Pause Subscription Temporarily	🔴 High	TO DO

Outcome

Business requirements were translated into Epics, User Stories, and Sprint Plans using Agile project management practices. The project demonstrates requirements analysis, backlog prioritization, sprint planning, requirements traceability, and stakeholder-focused documentation throughout the Business Analyst lifecycle.
