

Business Requirement Document (BRD)

Field	Value
Project	Subscription Cancellation & Retention Platform
Version	1.0
Status	DRAFT
Owner	Manvi Mehta
Target Release	Q3 2026

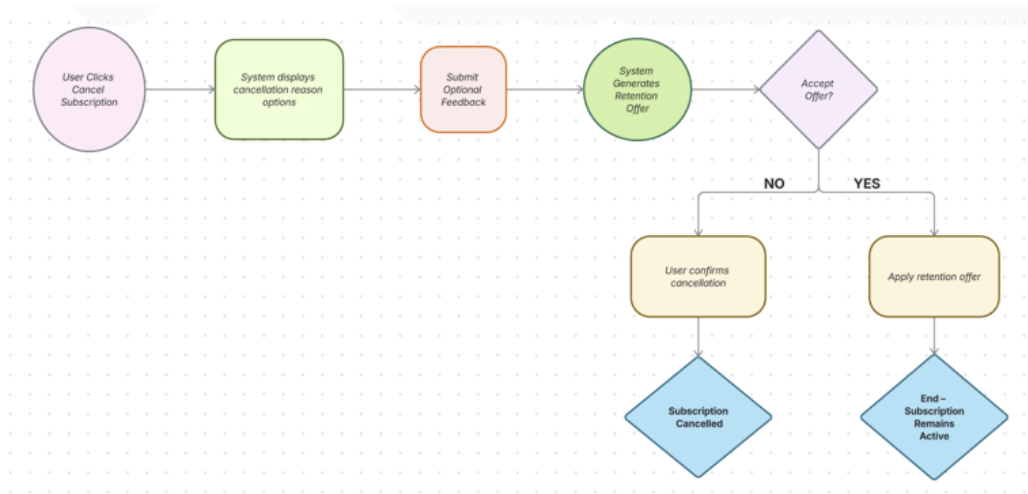

- 1. Business Workflow
- 2. Business Rules
- 3. Retention Offer Logic
- 4. Data & Reporting Requirements
- 5. Success Metrics
- 6. Assumptions
- 7. Risks

 **Purpose:** This document defines the business requirements for the Subscription Cancellation & Retention Platform. The objective is to improve customer retention by understanding cancellation behaviour and presenting targeted retention options before a subscription is finalised for cancellation.

Current State	Future State
Customer cancels immediately	Customer enters retention journey
No feedback captured	Feedback captured
No retention attempt	Retention offer displayed
Limited churn insights	Detailed churn analytics

1. Business Workflow

To reduce churn, the cancellation process will transition from an immediate cancellation action to a structured retention journey.

This structured flow ensures the business captures meaningful data while offering customers relevant alternatives before leaving.

2. Business Rules

Rule ID	Business Rule	Priority
BR-001	Customer must select at least one cancellation reason before proceeding.	HIGH
BR-002	Only one retention offer can be shown per cancellation attempt.	HIGH
BR-003	Customers must always have the option to continue with cancellation after viewing an offer.	HIGH
BR-004	Subscription pause (if offered) cannot exceed 3 months.	HIGH

BR-005	Customers cannot receive the same promotional offer more than once within 6 months.	MEDIUM
BR-006	Customers retain access to services until the end of their current billing cycle after cancellation.	HIGH
BR-007	Cancellation activity must be captured to enable business reporting and trend analysis.	HIGH

3. Retention Offer Logic

The system will determine retention offers based on the primary cancellation reason selected by the customer.

Cancellation Reason	Retention Offer
Too Expensive	Discounted subscription offer
Not Using Enough	Downgrade to Basic Plan
Technical Issues	Free service extension or support assistance
Moving to Competitor	Pause subscription for up to 3 months

This rule-based mapping ensures relevant and personalized retention interventions.

4. Data & Reporting Requirements

To support business decision-making, the system must track and report the following:

- Total cancellation attempts
- Completed cancellations
- Cancellation reasons and trend analysis
- Retention offer acceptance rate
- Revenue retained through accepted offers
- Cancellation trends by subscription tier (Basic, Standard, Premium)
- Customer feedback comments and sentiment trends

This data will be used by the Product, Marketing, Customer Success, and Management teams to identify churn drivers, evaluate retention strategies, and support business decision-making.

5. Success Metrics

The success of the platform will be evaluated based on:

- Reduce customer churn rate.
- Increase visibility into cancellation reasons.
- Increased retention offer acceptance rate
- Measurable improvement in Customer Lifetime Value (LTV)
- Improved customer satisfaction during the cancellation journey

6. Assumptions

- Customers have an active subscription before initiating cancellation.
- Retention offers are predefined by the business team.
- Customers can provide optional feedback during cancellation.
- The platform supports multiple subscription plans.

7. Risks

- Customers may ignore retention offers.
- Customers may provide incomplete feedback.
- Complex cancellation journeys may negatively impact user experience.
